Making a World of Difference
All Over the World
Clinical Training

Our highly specialized team is located around the world. Their expertise in the neonatal, pediatric and respiratory fields is designed to provide you with the safe and proper use of our products.

Clinical Consultants can provide in-servicing for your staff. Our Clinical Consultants are also available to assist our distributor representatives. If you are interested in training please contact our office at (800) 966-0500.

New Product Development

Do you have an idea for a new product? Neotech can help make it a reality!
Do you have a problem in your unit, but no idea what the product solution is? We can help with that too!

We have a great history of successfully licensing new product ideas and bringing them to market. We can help you every step of the way. We’re easy to work with and we move forward quickly at no cost to you. Visit neotechproducts.com/newproduct to learn more or call us to receive a new product submission form.

Look for this icon for our Home Health products. Visit neotechhomehealth.com for more information.

About NeoBond® Hydrocolloid

Important, Please Read!

Skin friendly NeoBond Hydrocolloid is a protective adhesive that helps decrease the risk of damage to the fragile epidermis of the neonate. *AWHONN Neonatal Skin Care (Third Edition, 2013)* recommends that hydrocolloids be used in place of other adhesives whenever possible.

Heat is the catalyst for hydrocolloid. The following steps are necessary to ensure the effectiveness of hydrocolloid based products.

**PREPARATION**

Clean and dry skin per hospital protocol.

Note: It is important for skin to be as clean and dry as possible. Products will not adhere properly to moist skin or hair. Oils and lotions will also adversely affect adhesion.

DO NOT USE ALCOHOL.

**APPLICATION**

Before removing liners, warm hydrocolloid in hands for 60 seconds. May also be held under radiant or heel warmer for 10 to 15 seconds.

Remove liners, apply hydrocolloid base to skin and hold in place for 60 seconds to ensure proper adhesion.

**REMOVAL**

Replace product every 5 days or per hospital protocol, whichever is sooner.

Saturate hydrocolloid with water or saline.

Slowly peel away from skin as you swab with water or saline.

Always refer to the Directions For Use for each individual product.
Neotech Ocular Exam Kit
Disposable Speculum and Depressor

FEATURES AND BENEFITS

- Disposable, sterile and ready to use
- Unique speculum designed to:
  - Lock in place with eyelid pressure
  - Allow unrestricted view
  - Open and close with ease
- Speculum available in two sizes
- Neonatal speculum (N6500, N6501, N6502) ideal for ROP exam
- Two-sided depressor with innovative texture intended to gently grip the conjunctiva
- Not made with natural rubber latex or plasticizer DEHP
- Individually packaged

U.S. Patent #9,289,199
New
Flow Caddy™
Tubing and Accessory Organizer

FEATURES AND BENEFITS

• Easy to use and fits onto several popular flow meters
• Eliminates need to tie tubing in knots over flow meter
• Helps to prevent tubing from contacting sensitive flow meter dials
• Enhances organization of respiratory equipment at the patient bedside
• Keeps accessories such as Christmas trees and O2 tubing connectors close at hand
• Ideal for all areas of the hospital; wherever there is a flow meter
• Moisture resistant and disposable
• Not made with natural rubber latex or plasticizer DEHP

NeoPockets™
Personal Incubator Organizer

FEATURES AND BENEFITS

• Apply and remove repeatedly with no adhesive residue
• Crystal clear vinyl allows for visibility of patient
• Adheres to most smooth surfaces
• Three pockets for:
  - Patient info
  - Thermometer
  - Family photos and more
• Contours to a variety of incubator models
• Not made with natural rubber latex or plasticizer DEHP
• Individually packaged

Neotech ChinStrap™
Respiratory Support Accessory

FEATURES AND BENEFITS

• Thick, soft, breathable, skin friendly NeoFoam® wicks perspiration
• Flexibility enables minimal mouth movement
• Form fitting and adjustable
• Split chin design for comfort and stability
• Ear openings to prevent folding over
• Designed to reduce the risk of pressure ulcers or necrosis
• Unique material helps to prevent sliding
• Not made with natural rubber latex or plasticizer DEHP

Little Sucker® Oral and Nasal Suction Device

Little Sucker® Cover® Suction Device Protective Cover

Little Sucker® Nasal Tip Nasal Suction Device
FEATURES AND BENEFITS

**Little Sucker**
- Designed for single handed suctioning
- Thumb port for intermittent suctioning
- Soft, flexible tip similar to a bulb syringe
- Not made with natural rubber latex or plasticizer DEHP
- Individually packaged

**Little Sucker Cover**
- Designed to protect the Little Sucker from damage, debris and external contaminants
- Bright blue color for better visibility
- Noise reducing port plug
- Not made with natural rubber latex or plasticizer DEHP
- Individually packaged

**Little Sucker Nasal Tip**
- Specialized tip designed to minimize potential tissue trauma
- Designed for single handed suctioning
- Thumb port for intermittent suctioning
- Soft, flexible tip similar to a bulb syringe
- Not made with natural rubber latex or plasticizer DEHP
