Made in USA

Hold-A-Line™

CATHETER AND TUBING HOLDER

INDICATIONS FOR USE

The Hold-A-Line is intended to anchor and support umbilical catheters and tubing. It is intended for use on pediatric (neonates, infants and children) patients.

DIRECTIONS FOR USE

Preparation

After catheter or tube is in place, clean and dry skin per hospital protocol.

Note: It is important for skin to be as clean and dry as possible. Hold-A-Line will not adhere properly to moist skin or hair. Oils and lotions will also adversely affect adhesion.

DO NOT USE ALCOHOL.

Application

- 1 Before removing liners, warm Hold-A-Line in hands for 60 seconds. May also be held under radiant or heel warmer for 10 to 15 seconds.
- 2 Discard white, paper liner, then peel and discard clear, plastic liner from hydrocolloid base.
- 3 Apply base to skin and hold in place for 60 seconds to ensure proper adhesion.
- 4 Peel and discard frosted liner and adhere catheter or tube to base.
- 5 Fold flap over catheter or tube, align with base and press firmly together, enclosing catheter or tube between adhesives.
- 6 Lift flap as needed to reposition or remove catheter or tube.

Removal

- 1 Replace Hold-A-Line every 5 days or per hospital protocol, whichever is sooner.
- 2 Lift flap to remove catheter or tube.
- 3 Saturate Hold-A-Line with water or saline.
- 4 Slowly peel Hold-A-Line away from skin as you swab with water or saline.
